# VOLUME 17 1986

## SUBJECT INDEX

Acetylation, 697
  γ-aminobutyric acid (GABA)
  dopamine
  α-melanocyte-stimulating hormone (α-MSH)
  melanotropes
  pars intermedia
  pro-opiomelanocortin
Active avoidance, 847
  drinking
  eating
  monkeys
  neuronal activity
Acute administration, 67
  chronic administration
  in vivo
  nortriptyline
  platelets
  serotonin uptake
  structure-activity relationships
  synaptosomes
Adenosine deaminase (ADA), 209
  immunohistochemistry
  perinergic neurotransmission
  retina
Adenosine deaminase (ADA)
immunoreactivity, 351
  5-hydroxytryptophan (5-HTP) uptake
  monoamine oxidase (MAO) activity
Adipsia, 823
  drinking
  eating
  lesions, anteroventral third ventricle area (AV3V)
  lesions, electrolytic
  lesions, medioventral septum (MVS)
  lesions, simultaneous AV3V-MVS
  polydipsia
Adjuvants, 473
  antigen myelin basic protein (MBP)
  clinical suppression
  experimental allergic encephalomyelitis (EAE)
  guinea pigs
  muramyl dipeptide
β-Adrenergic receptors, 705
  autoradiography
  [$^{125}$I]cyanopindolol
  pituitary, rabbit
Alloxan, 545
  diurnal rhythm
  glucagon satiety
  hepatic vagotomy
Amine accumulation, 145
  body weight regulation
  6-hydroxydopamine (6-OHDA)
  lesions, 6-hydroxydopamine (6-OHDA)
  lesions, radio frequency
  neurochemical specificity
  non-specific damage
Amino acid pairing, 519
  bovine pineal antireproductive tripeptide
  luteinizing hormone-releasing hormone (LHRH)
  peptide interactions, sequence specific
  peptide modulation
γ-Aminobutyric acid (GABA)
  acetylation, 697
  angiotensin II, 265
  cardiovascular responses, 265
  dopamine, 697
  drinking responses, 265
  glutamate decarboxylase (GAD) activity, 717
  in vitro, 717
  α-melanocyte-stimulating hormone (α-MSH), 697, 717
  melanotropes, 697
  neurointermediate lobe, frog, 717
  pars intermedia, 697
  pro-opiomelanocortin, 697
  spiperone, 265
  ventral tegmental area, 265
d-Amphetamine (AMPH), 681
  catecholamines
  eating
  macronutrient selection
  meal patterns
Amygdala, 321
  anterograde HRP transport
  prefrontal cortex projections
  retrograde transport
  visceral forebrain
Angiotensin II, 265
  gamma amino butyric acid (GABA)
  cardiovascular responses
  drinking responses
  spiperone
  ventral tegmental area
Angiotensin II (Ang II) binding sites, 497
  cervical vagotomy
  dog brain
  nodose ganglionectomy
  rostral medulla
  vagus nerve
Anoretic drugs, 873
  glucoprivic feeding
  hypothalamus
  [$^{3}$H]mazindol binding
Anorexia
  body weight, 575
  brain monoamines, 575
  corticotropin releasing factor (CRF) release, 285
  eating, 285, 575
  fenfluramine, 575
  gastric emptying, 575
  gastric retention, 127
  hamsters, 575
  phenylpropanolamine (PPA), 127
  stress, 285
Anterior midline cortex, 493
  gastric pathology
  immobilization stress
  lesions, anterior midline cortex
  lesions, radiofrequency
  stress adaptation
  ulcers
Anterograde HRP transport, 321
  amygdala
  prefrontal cortex projections
  retrograde transport
  visceral forebrain
Antidromic responses, 743
  forebrain structures
  orthodromic excitatory responses
  paraventricular nucleus connections
Antigen myelin basic prolein (MBP), 437
  adjuvants
  clinical suppression
  experimental allergic encephalomyelites
  guinea pigs
  muramyl dipeptide
Antisera development, 219
  gonadotropin-releasing hormone associated peptide (GAP)
  LHRH-prohormone
  radioimmunoassay
Apparatus
  microcirculation chamber, 1
  PC-compatible computer, 129
D-Aspartate release, 243
  cerebellar glomeri
  prostaglandins
Astrocytes, 225
  dopaminergic denervation
  gliosis
  6-hydroxydopamine (6-OHDA)
  1-methyl-4-phenyl-1,2,3,6-tetrahydro-pyridine (MPTP)
Atrial natriuretic factor (ANF)
  atrial natriuretic factor binding sites, 767
  calcitonin gene-related peptide (CGRP), 83
  diabetes insipidus, 767
  galanin (GAL), 83
  immunocytochemistry, 83
  subfornical organ, 767
Atrial natriuretic factor binding sites, 767
  atrial natriuretic factor (ANF)
  diabetes insipidus
  subfornical organ
Atrial natriuretic peptide (ANP), 141
  diuresis
  fluid homeostasis
  natriuresis
Autoradiography, 705
  β-adrenergic receptors
  [$^{125}$I]cyanopindolol
  pituitary, rabbit
Axonal regeneration, 737
  growth-associated proteins
  phosphoprotein B-50
  sciatic nerve, contralateral intact
  sciatic nerve, crushed
Axonogenesis, 307
  nervous system development

ornithine decarboxylase (ODC)/polyamine system
synaptogenesis

Baboons, 535
bombesin
intraventricular administration
meal size
Basilar pontine nuclei, 169
GABA-ergic neurons
horseradish peroxidase studies
immunocytochemistry
Basolateral amygdala, 335
efferent projections
opossums
Behavioral procedures, 137
electro-convulsive shock
hypothalamus
proline endopeptidase activity
Benzodiazepine receptors, 627
β-carbolines
eating
Biosynthesis activity, 725
calcium currents
chloride currents
GABA-A receptors
GABA-B receptors
pars intermedia
secretory activity
Blood-brain barrier, 829
brain capillaries
Tyr-MIF-1 binding
Blood-CSF barrier, 155
delta sleep-inducing peptide (DSIP)
dogs
physiochemical parameters
Blood glucose level, 427
food access
meal initiation
temporal relationship
Blood pressure, 51
monosodium glutamate (MSG)
neonatal administration
obesity
sex differences
vasopressin levels
Body composition, 563
brown adipose tissue
hyperphagia
lactation
obesity
Body development regulation, 5
brain development regulation
endogenous opioids
β-funaltrexamine
opioid receptors
Body weight
anorexia, 575
brain monoamines, 575
brown adipose tissue, 643
diabetes, 861
diethylstilbestrol (DES), 885
drinking, 861
eating, 575, 861
fenfluramine, 575
gastric emptying, 575
genetic breeding, 885
hamsters, 575
hamsters, females, 59
high-carbohydrate diet, 861
high-fat diet, 861
lesions, lateral hypothalamus, 643
lesions, tegmental, 59
long-term effects, 885
lordosis, 59
pituitary gland, 885
thermogenesis, 643
utilizable fuel, 861
Body weight regulation, 145
amine accumulation
6-hydroxydopamine (6-OHDA)
lesions, 6-hydroxydopamine (6-OHDA)
lesions, radio frequency
neurochemical specificity
non-specific damage
Bombesin (BBS)
baboons, 535
cholescystokinin (CCK), 615
intraventricular administration, 535
meal size, 535
pancreatic glucagon (PG), 615
peptide interactions, 615
satiety, 615
synergy, 615
Bovine pineal antireproductive tripeptide, 519
amino acid pairing
luteinizing hormone-releasing hormone (LHRH)
peptide interactions, sequence specific peptide modulation
Brain
amygdala, 32, 897
amygdalo-hippocampal area, 335
anterior agranular insular area, 335
anterior amygdaloid area, 335
anterior basolateral nucleus (BLa), 335
anterior commisure, 335
anterior hypothalamus, 387
anterior hypothalamus/preoptic area (AH/POA), 117, 249, 379
anterior midline cortex, 493
anterior pretectal nucleus, 169
anteroventral third ventricle (AV3V), 823
arcuate nucleus, 711
area postrema (ap), 497, 767
basilar pons, 169
basilar pontine nuclei, 169
basolateral amygdala, 335
basomedial nucleus (BM), 335
bed nucleus, proprioris commissurae, 743
bed nucleus, stria terminalis, 335, 743
brainstem, 41, 189
caudate nucleus, 107
central nucleus, 335
central subnucleus, 83
cerebellar lamina, 307
cerebellum, 41, 107, 189
cerebral cortex, 189, 809
choroid plexus, 767
cingulate cortex, 529, 743
claustrum, 529
commissural bundle, 335
corpus callosum, 809
corpus striatum, 809
diencephalon, 249, 367, 379
dorsal horn, 11
dorsal lateral subnucleus, 83
dorsal motor nucleus of the vagus (dmnX), 497
dorsal vagal complex, 51
dorsolateral pons, 809
dorsolateral prefrontal cortex, 335
dorsomedial hypothalamic nucleus, 451
frontal cerebral cortex, 107
frontal cortex, 335, 529, 751, 889
hippocampus, 107, 291, 461, 737
hypophyseal intermediate lobe, 725
hypothalamic pituitary adrenal axis, 285
hypothalamus, 75, 137, 219, 367, 663, 711, 809
inferior olive, 773, 785
infralimbic area, 321
intermediate lobe, 705, 711
interpeduncular nucleus, 83
lamina II, 11
lateral cerebellar nucleus, 169
lateral hypothalamus, 551, 643, 873, 879, 889
lateral nucleus (L), 335
lateral perifornical hypothalamus (PFH), 681
lateral septum, 743
lateral subnucleus, 83
lateral ventricles, 809
left parieto-occipital cortex, 391
locus coeruleus, 759
medial hypothalamus, 751, 889
medial orbital area, 321
medial prefrontal cortex, 321
medial preoptic area, 75, 387
median eminence, 51, 219, 711
median raphé nucleus, 461
medioventral septum (MVS), 823
medula oblongata, 197, 397
medullary reticular formation, 169
mesencephalon, 33
midbrain, 41, 189
midbrain central gray, 59
midbrain raphe nuclei, 477
motor cortex, 751
neostriatum, 751
neurointermediate lobe, 717
nucleus accumbens, 265
nucleus raphe dorsalis, 801
nucleus tractus solitarii (nTs), 497
occipital cortex, 529
olfactory cortex, 335
olfactory tubercle, 335
orbital sulcus, 335
paraventricular nucleus, 51, 583, 743, 873, 873, 889
pars intermedia, 697, 725
pedunculopontine nucleus, 33
perirubal area, 169
periventricular gray, 759
pituitary, 705, 711, 717
pontine nuclei, 169
posterior basolateral nucleus (BLp), 335
posterior hypothalamus, 249, 351
posterior lateral hypothalamus, 145
posterior lobe, 705
prelimbic area, 321, 751
preoptic area, 219, 743
retino-hypothalamic tract, 477
rostral hypothalamus, 379
rostral medulla, 497
rostral subnucleus, 83
somatosensory cortex, 507

stria terminalis, 335
striatum, 107, 225, 255, 477
subfornical organ, 767
substantia innominata, 335, 847
substantia nigra, 225, 477
substantia nigra, pars reticulata (SNR), 275
suprachiasmatic nucleus, 759
supraoptic nucleus, 51
taenia tecta, 321
third cerebral ventricle, 367
tuberomammillary nucleus (TM), 351
ventral anterior cingulate area, 321
ventral hypothalamus (VMH), 873
ventral lateral entorhinal area, 335
ventral mesencephalon, 809
ventral putamen, 335, 847
ventral striatum, 335
ventral subiculum, 335
ventral tegmental area, 265
ventromedial hypothalamus, 159, 335, 409, 551, 583
zona incerta, 169
Brain capillaries, 829
blood-brain barrier
Tyr-MIF-1 binding
Brain development, 41
DNA synthesis
maternal nicotine injection
nicotine
ornithine decarboxylase
prenatal exposure
Brain development regulation, 5
body development regulation
endogenous opioids
β-funaltrexamine
opioid receptors
Brain, monkey, 809
dopamine neuroblasts
fetal catecholamine neurons
nerve cell grafting
norepinephrine neuroblasts
Brain monoamines, 575
anorexia
body weight
eating
fenfluramine
gastric emptying
hamsters
Brown adipose tissue
body composition, 563
body weight, 643
hyperphagia, 563
lactation, 563
lesions, lateral hypothalamus, 643
obesity, 563
thermogenesis, 643
Burn injury, 367
scanning electron microscopy
supraependymal neurons (SEN)

Calcitonin gene-related peptide (CGRP), 83
atrial natruiretic factor (ANF)
galanin (GAL)
immunocytochemistry
Calcium, 291
hippocampus
long-term potentiation
synaptic transmission
time course
Calcium antagonist, 249
cats
hyperthermia
hypothermia
verapamil
Calcium currents, 725
biosynthesis activity
chloride currents
GABA-A receptors
GABA-B receptors
pars intermedia
secretory activity
Calcium dependence, 773
dye-coupling
guinea pig brains
interior olive neurons
intracellular electrophysiology
oscillatory behavior
tetrodotoxin
β-Carbolines, 627
benzodiazepine receptors
eating
Cardiovascular responses, 265
gamma amino butyric acid (GABA)
drinking responses
spiperone
ventral tegmental area
Catecholaminergic neurotransmitter system, 189
perinatal dietary supplementation
soy lecithin
Catecholamines, 681
d-amphetamine (AMPH)
eating
macronutrient selection
meal patterns
Cats
calcium antagonist, 249
clonidine, 379
decerebration, 181
decortication, 181
hypercapnia, 181
hyperthermia, 249
hypoglossal nerve, 181
hypothermia, 249
intramucosal distribution, 95
locomotor impairment, 379
medulla oblongata, 197
M-2 muscarinic receptors, 279
mydriasis, 379
nodose ganglion, 95
phenylethanolamine-N-methyltransferase (PNMT), 197
phrenic nerve, 181
rostral hypothalamus, 379
salivation, 279
sensory nerve fibers, 95
verapamil, 249
Cats, freely moving, 461
electrophysiology
neuron transplants
raphe grafts, intrahippocampal
serotonin
sleep-wake cycle
Cellular morphology, 785
cytoarchitecture
Golgi stain
guinea pig brains
horseradish peroxidase (HRP) injection
inferior olive
Central mechanisms, 117
hamsters, Helium-cold (He-Cold) hypothermic
hypothermic
Cerebellar glomeruli, 243
D-aspartate release
prostaglandins
Cerebral blood flow (CBF) studies, 391
dimethyl sulfoxide (DMSO)
indomethacin
lesions, cryogenic
rabbits
Cervical vagotomy, 497
angiotensin II (Ang II) binding sites
dog brain
nodose ganglionectomy
rostral medulla
vagus nerve
Chick embryonic development, 297
spinal cord 5-HT neurons
Chloride currents, 725
biosynthesis activity
calcium currents
GABA-A receptors
GABA-B receptors
pars intermedia
secretory activity
Chloride ionophore, 123
ethanol
GABAergic transmission
spinal cord cultured neurons
Cholecystokinin (CCK)
bombesin (BBS), 615
dogs, 445
pancreatic glucagon (PG), 615
pancreatic secretion, 445
peptide interactions, 615
satiety, 445, 615
synergy, 615
Cholecystokinin-8 (CCK-8), 571
eating
receptor sensitivity
satiety
strain differences
Chronic administration, 67
acute administration
in vivo
nortriptyline
platelets
serotonin uptake
structure-activity relationships
synaptosomes
Claustral collateralization, 529
claustral topographic organization
claustrum
Claustral topographic organization, 529
claustral collateralization
claustrum
Claustrum, 529
claustral collateralization
claustral topographic organization
Clinical suppression, 473
adjuvants
antigen myelin basic protein (MBP)
experimental allergic encephalomyelitis (EAE)
guinea pigs
muramyl dipeptide
Clonidine, 379
cats
locomotor impairment

mydriasis
rostral hypothalamus
Compensatory refeeding, 451
lesions, dorsomedial hypothalamus
organismic set point
weaning body weight
Constant bright light, 759
estrous, persistent
lesions, electrolytic
lesions, locus coeruleus
lesions, periventricular gray
locus coeruleus
periventricular gray
Corticofugal influences, 21
retinal output
visual cortex
Corticotropin releasing factor (CRF) release, 285
anorexia
eating
stress
[$^{125}$I]Cyanopindolol, 705
$\beta$-adrenergic receptors
autoradiography
pituitary, rabbit
Cytoarchitecture, 785
cellular morphology
Golgi stain
guinea pig brains
horseradish peroxidase (HRP) injection
inferior olive

D-2 receptors, 605
sham feeding
sucrose
Decerebration, 181
cats
decortication
hypercapnia
hypoglossal nerve
phrenic nerve
Decortication, 181
cats
decerebration
hypercapnia
hyperglossal nerve
phrenic nerve
Delta sleep-inducing peptide (DSIP), 155
blood-CSF barrier
dogs
physiochemical parameters
Diabetes
body weight, 861
dietary self-selection, 653
drinking, 861
eating, 653, 861
high-carbohydrate diet, 861
high-fat diet, 653, 861
utilizable fuel, 861
Diabetes insipidus, 767
atrial natriuretic factor (ANF)
atrial natriuretic factor binding sites
subfornical organ
Dietary self-selection, 653
diabetes
eating
high-fat diet
Diethylstilbestrol (DES), 885
body weight
genetic breeding
long-term effects
pituitary gland
Differential innervation, 819
monkeys, fetal
motor nuclei
serotonin (5HT) immunoreactivity
spinal cord
substance P (SP) immuroreactivity
Digital filtering, 129
hippocampal field potentials
Dimethyl sulfoxide (DMSO), 391
cerebral blood flow (CBF) studies
indomethacin
lesions, cryogenic
rabbits
Diuresis
atrial natriuretic peptide (ANP), 141
drug interaction, 469
fluid homeostasis, 141
Na, K-ATPase activity, 469
natriuresis, 141, 469
ouabain, 469
vanadate ($VO^{-}_{3}$), 469
Diurnal rhythm, 545
alloxan
glucagon satiety
hepatic vagotomy
DNA synthesis, 41
brain development
maternal nicotine injections
nicotine
ornithine decarboxylase
prenatal exposure
Dog brain, 497
angiotensin II (Ang II) binding sites
cervical vagotomy
nodose ganglionectomy
rostral medulla
vagus nerve
Dogs
blood-CSF Carrier, 155
cholecystokinin (CCK), 445
delta sleep-inducing peptide, 155
pancreatic secretion, 445
physiochemical parameters, 155
satiety, 445
Dopamine, 697
acetylation
$\gamma$-aminobutyric acid (GABA)
$\alpha$-melanocyte-stimulating hormone ($\alpha$-MSH)
melanotropes
pars intermedia
pro-opiomelanocortin
Dopamine neuroblasts, 809
brain, monkey
fetal catecholamine neurons
nerve cell grafting
norepinephrine neuroblasts
Dopaminergic denervation, 225
astrocytes
gliosis
6-hydroxydopamine (6-OHDA)
1-methyl-4-phenyl-1,2,3,6-tetra-hydropyridine (MPTP)
Down-regulation, 255
enkephalin
in vivo
opioid receptors
Drinking
active avoidance, 847
adipsia, 823
body weight, 861
diabetes, 861
eating, 823, 835, 847
emotional stimuli, 75
fructose, 835
high-carbohydrate diet, 861
high-fat diet, 861
lesions, anteroventral third ventricle area (AV3V), 823
lesions, electrolytic, 823
lesions, medioventral septum (MVS), 823
lesions, simultaneous AV3V-MVS, 823
liver denervation, 835
monkeys, 75, 847
morphine, 639
naloxone, 639
neuronal activity, 847
opioid receptors, 639
polydipsia, 823
sex differences, 835
sucrose, 835
sucrose-intake, 639
thermosensitive neurons, 75
utilizable fuel, 861
Drinking responses, 265
gamma amino butyric acid (GABA)
angiotensin II
cardiovascular responses
spiperone
ventral tegmental area
Drug
acetylcholine (ACh), 117
alloxan, 545
gamma amino butyric acid (GABA), 265, 697
amphetamine, 873
d-amphetamine (AMPH), 681
atropine, 271, 279, 379, 539
baclofen, 717, 725
bicuculline, 717, 725
cadmium, 725
calcium, 291
carbachol, 117, 279
castanospermine, 259
chlorpromazine, 379
clonidine, 379
cobalt ions, 21
colchicine, 83
d-deoxyglucose (2DG), 855
2-deoxy-D-glucose, 583
3-deoxypentonic acid (3-DPA), 551
2-deoxytetronic acid (2-DTA), 551
deprenyl, 477
diethylstilbestrol (DES), 885
$\alpha$-difluoromethylornithine (DFMO), 307
dimethyl sulfoxide (DMSO), 391
DMCM, 627
dopamine, 697
dopamine hydrochloride (DA), 681
l-epinephrine bitartrate (EPI), 681
eserine, 279
ethanol, 123
FG 7142, 627
$\beta$-funaltrexamine, 5
glucose, 415, 435, 621
D-glucose, 271
haloperidol, 605
5-hydroxytryptamine (5-HT), 117
L-5-HTP, 477

6-hydroxydopamine (6-OHDA), 145, 225
ibuprofen, 243
indomethacin, 391
isoguvacine, 725
lidocaine hydrochloride, 21
mecamylamine, 279
metergoline, 801
methoxamine, 379
methyl palmoxirate, 855
1-methyl-4-phenyl-1,2,3,6-tetra-hydropyridine (MPTP), 225
dl-α-methyl-p-tyrosine methyl ester hydrochloride (α-MpT), 681
methylsergide, 379
monosodium glutamate (MSG), 51
morphine, 5, 639
muscimol, 275, 717
naloxone, 379, 639
naltrexone, 5
nicotine, 41
nicotonic acid, 855
norepinephrine, 379
norfenfluramine, 663
nortriptyline, 67
phentolamine, 379
phenylephrine, 379
phenylpropanolamine, 127
picrotoxin, 717
pimozide, 605
prostaglandin$_2$ ($PGE_2$), 117
serotonin, 507, 663, 801
spiperone, 265
SR 95103, 725
streptozotocin, 861
(−)-sulpiride, 605
sultopride, 605
swainsonine, 259
tetrodotoxin, 773
tunicamycin, 259
vanadate ($VO^{-}_{3}$), 469
verapamil, 249
yohimbine, 379
ZK 91296, 627
ZK 93423, 627
ZK 93526, 627
Drug interaction
diuresis, 469
eating, 539
liver/pancreatic interactions, 539
Na, K-ATPase activity, 469
natruiresis, 469
ouabain, 469
satiety, 539
vanadate ($VO^{-}_{3}$), 469
Dye-coupling, 773
calcium dependence
guinea pig brains
inferior olive neurons
intracellular electrophysiology
oscillatory behavior
tetrodotoxin

Eating
active avoidance, 847
adipsia, 823
d-amphetamine (AMPH), 681
anorexia, 285, 575
benzodiazepine receptors, 627
body weight, 575, 861
brain monoamines, 575
β-carbolines, 627
catecholamines, 681
cholecystokinin (CCK), 445
cholecystokinin-8 (CCK-8), 571
corticotropin releasing factor (CRF) release, 285
diabetes, 653, 861
dietary self-selection, 653
dogs, 445
drinking, 823, 835, 847
drug interactions, 539
emotional stimuli, 75
fenfluramine, 575
fructose, 835
gastric emptying, 575
glucagon, 419
glucose inhibition, 673
hamsters, 575
high-carbohydrate diet, 861
high-fat diet, 653, 861
lesions, anteroventral third ventricle area (AV3V), 823
lesions, electrolytic, 823
lesions, medioventral septum (MVS), 823
lesions, simultaneous AV3V-MVS, 823
liver denervation, 835
